You know, it doesn't have to be this way.

What d

you mean?

Transactional Messaging doesn't have to be complicated

or

take up so much of your time.

moengage

HOW?

Imagine

if you could use a platform
that reduced developer
dependency for Transactional Messaging.

Then I'd have to do it myself.
That'll get too

complicated & time consuming!

moengage

Not if it was an easy interface. Like...

MoEngage **Inform**

TELL ME MORE!

MoEngage Inform is a one-stop shop for everything Transactional Messaging.

It's a single-API solution with a code-free editor and limiteless integrations.

Inform lets you manage 30+ providers across multiple channels from one place, edit and send messages within seconds.

moengage

This sounds super expensive...

Not at all!!

We've seen that Inform can save you upto

60%

of your costs!

60% cost saving?

That's crazy! Say no more.

Schedule a quick demo
